

## Letter of Recommendation for Ms. Kamila Fraid

Dear Sir or Madam,

It is with great pleasure that I recommend Ms. Kamila Fraid as a candidate for studies at your university. I had the opportunity to work with Ms. Kamila over the past year at Capgemini POLSKA SP. Z O.O., where she completed an internship and subsequently had her contract extended. Currently, Ms. Kamila is working in the field of Data Science.

During our collaboration, Ms. Kamila demonstrated strong technical knowledge, independence, and the ability to quickly learn new technologies. She participated in projects involving application development, data analysis, process automation, machine learning, and artificial intelligence, making a significant contribution to each. Her analytical, logical, and effective approach to problem-solving was particularly impressive.

It is also worth noting that during her internship, Ms. Kamila, together with three colleagues, won second place in an international artificial intelligence competition organized in collaboration with AWS and UNESCO. The competition attracted 1,500 participants from around the world.

In addition to her technical skills, Ms. Kamila has shown a high level of professionalism, teamwork abilities, and a strong commitment to professional development. I am confident that pursuing studies at your university will be a natural next step in her career and will allow her to fully realize her potential.

I wholeheartedly recommend Ms. Kamila as a candidate for your program.

Sincerely

**Martyna Kowalewska**
